25X1C

In connection with the G-2 inquiry on the possible release of NIE-33 to SHAPE, the National Estimates Board and O/NE Staff at its 0900 meeting today disapproved the procedure by which AD/NE would, on authorization from DCI, sanitize, obtain Agency approval for and approve release of NIE's to foreign governments other than that of the chief reasons advanced were:

- 1. As a matter of principle, NIEs, being prepared to serve the purposes of national policy, should not be altered to serve other purposes; any sanitization for SHAPE use would take the heart out of an NIE and make it worthless.
- 2. The task of sanitizing and recoordinating would require virtually duplication of the work on a given estimate.
- 3. The possibility that an estimate might ultimately be given SHAPE release would materially reduce the frankness of intelligence expression in it.
